

Why Ventsations® Brand Vent Clips? Advanced Design & Better Fragrances

An American-Made Original™

The fragrances and materials are all American products, manufactured in the U.S.A.

One-Of-A-Kind, Patented AIR FLOW TECHNOLOGY™ and design uses tiny holes to “Trap and Force Air Flow” and emit our realistic time release aromas **without** using alcohols, glycols, or gel-type chemicals to evaporate the aroma.

This innovative combination allows us to create a more effective and enjoyable fragrance product.

Our patented Perforated Design ALSO reduces cost and allows for professional bulk use; economical attendant/employee application without pieces breaking/separating within the container or after application in the customer's vehicle - **This is a HUGE safety benefit.**

So What Does All This Mean For Your Customers?

- Our Professionally American Engineered fragrance selection is superior to all competition. Many of our fragrances have taken over a year to formulate, test and perfect. We take this task seriously because we want your customer to be THRILLED with the choice you've made for them - and they will be.
- DrySafe Technology™ - **CLEANER, NON-OILY PRODUCT**
- After 10 years, OVER 95% of all TrendStars customers that have made the switch to Ventsations® ARE STILL USING AND SELLING them to their customers, due to **HIGH CONSUMER APPROVAL. CAN ANY OTHER BRAND HONESTLY MAKE THIS CLAIM??**
